PSG GHARB CHEMICAL COMPANY

LABSA (SULFOCID-97)

Sulfocid is an economical and versatile, biodegradable anionic surfactant. This product can be neutralized with a variety of inorganic bases and organic amines to give a wide range of sulfonates with the properties of your choice. Sulfocid can be used to make both liquid and dry products. It is an effective surfactant in acidic environments. Sulfocid contains a minimum of sulfuric acid and upon neutralization produces material with little salt, light color and low odor, allowing wide latitude in formulations.

Producer	Applications
